DETAILED ACTION

This Office Action is in response to the communication filed 7/1/08. Applicant's arguments have been considered, but are not entirely persuasive. Claims 1, 11, 12 and 21-23 are pending. This Action is Non-FINAL.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/1/08 has been entered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1795

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 11, 12 and 21-23 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,773,850. Although the conflicting claims are not identical, they are not patentably distinct from each other because both require a shock-absorbing structure of a battery cover comprising a battery cover which protects at least one battery and a plurality of shock-absorbing ribs formed on an outer surface of the battery cover.

Examiner notes a terminal disclaimer was received on 1/4/08. The terminal disclaimer has not been reviewed by the paralegal staff to determine if it is proper. The double patenting rejection will be removed if the disclaimer is deemed proper.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 23 recites "disposed at positions respectively opposed to positions of a plurality of externally-threaded electrodes", which is indefinite. It is unclear what "positions respectively opposed to positions" encompasses.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1795

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Henk, US 4,400,449.

Henk teaches a battery having a top cover 43 with ribs 53 on the upper side of the cover and a steel plug 52 that serves for the connection of an outer supply conductor (external electrode). See Fig. 5 and col. 9, lines 11-18. The cover may comprise polystyrene (note the claims do not require the cover to *consist* of an insulating synthetic resin). Figure 5 is a top view of the battery of Figure 3 (7:7-8). The battery has electrodes. Thus the claims are anticipated.

Response to Arguments

Applicant's arguments filed 7/1/08 have been fully considered but they are not entirely persuasive. Applicant argues Henk fails to teach or suggest that the ribs 53 are provided at positions substantially symmetrical to positions of electrodes of a battery. Examiner disagrees. The ribs 53 are symmetrical with regards to the steel plug 52 (external electrode).

In a telephone interview with Allison Tulino on 9/15/08, the Examiner stated a second interview would be granted to discuss the pending rejections and/or further claim amendments if requested by Applicant. Claims 11 and 12 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tracy Dove whose telephone number is 571-272-1285. The examiner can normally be reached on Monday-Thursday (9:00-7:30).
